

# The Fastest Way to Create Web Forms and Collect Results

without writing a single line of code.

- ✓ beautiful forms
- ✓ self hosted
- ✓ anti-spam
- ✓ full PHP source code

Impress your visitors  
with the most important thing  
a website must have:  
**(well-designed) forms**

## What is MachForm?

MachForm is an intuitive, browser based, self-hosted HTML form builder program. Designed as a **modern HTML form builder**, it makes use of the latest web technologies like AJAX, CSS, and Javascript to provide a fluid browser based experience.

## Why MachForm?

Built for ease of use, creating form is now as **effortless as typing**. No programming experience is needed. Its interface will give anyone the ability to publish online forms or surveys and gather information within minutes.

## Our Support

To make it even easier for you, MachForm comes with **free installation service**. At your request, we will setup MachForm on your server within 2 business days.

## Get It Now!

**ONLY RM 500.00**  
**Per License**

If you're not completely satisfied within 30 days of purchase, we'll refund your money; hassle-free.

## Requirements

In order to run MachForm your web server must support:

- PHP version 4.3.0 or newer.
- MySQL version 4.1.0 or newer.

Please check with your host if you are unsure about any of these requirements before purchasing.

# What's New in MachForm Version 2

MachForm Version 2 is now live and packed with new features, interface and performance improvements, and bug fixes. Below is a look at the highlights of the release. Enjoy!

## Email Autoresponder

Job Application Form > Emails  
Configure your email notification settings

Send notification emails to =>

You

Your Email Address

more options >

Save Changes

Your Users

Send To

Your Email Address

Your Email Address

more options >

Save Changes

Adding autoresponder to your form is now as easy as choosing from dropdown. For every form submission, you can now send an instant notification email to your users. This allows you to respond quickly to your users.

## Better, Prettier Email Design

What job are you applying for? Software Developer

Applicant Name Anna Main

Applicant Address 1378 Lynn Ogden Lane  
Beaumont, Texas 77701  
United States

What days are you available for interview? Monday  
Tuesday  
Wednesday  
Thursday

Are you willing to relocate? Yes

Upload your resume resume.doc

Your Email Address AnnaVMain@fontdrift.com

When can you start? 06/21/2008

Salary Requirements \$70000.00

Don't like the old plain text email format? Well, you'll definitely love the new design! Styled in a tabular design, the new email format enhances the readability of your form submission. A great relief for you who have large forms

## Fully Customizable Email

Email Header

From Name Appnitro Software

From Email address jobs@appnitro.com

Email Content

Subject (form\_name) - Receipt

Content Dear {element\_1},

Thank you for submitting your application. We have received it and will contact you immediately.

Below is your submission data: {entry\_data}

Send emails in simple text format

hide options >

Save Changes

The email is not just prettier, it's smarter! Version 2 adopts a new template system that would allow you to fully customize the subject, sender address and content of your notification emails. You can grab the values of your form submission and insert it to the email. This allows you to send a personalized autoresponder to your users.

## Revamped Entry Manager

Job Application Form > Entries  
Edit and manage your form entries

Export all entries: Excel File CSV File

Delete Selected or Delete All Entries Choose Columns

#	Date Created	What job are yo...	Applicant Nam...	Applicant Nam...	Applicant Addr...	City
6	4 hours ago	Software Develo...	Natalie	Shinsel	4252 Lyndon Str...	Plymouth
5	4 hours ago	System Analyst	Charlie	Daniel	4490 Fidler Drive	San Antonio
4	4 hours ago	Graphic Designer	Walter	Flemmon	1170 Poplar Lane	Coral Gables
3	4 hours ago	Graphic Designer	Garrett	Accola	4660 Ashford Dr...	Leesburg
2	4 hours ago	System Analyst	Margaret	Taylor	4097 Layman Av...	Candor
1	4 hours ago	Software Develo...	Anna	Main	1378 Lynn	Beaumont

Viewing 1-6 of 6 entries

The new entry manager is a complete improvement from the previous version. Packed with a lot of new features, it allows you to manage your entries even faster and easier.

## Columns Display Preference

Job Application Form > Entries > Choose Columns  
Specify which columns are displayed in Entries table

Choose columns to be displayed:

- Date Created
- Date Updated
- IP Address
- What job are you applying for?
- Applicant Name - First
- Applicant Name - Last
- Applicant Address - Street Address
- Address Line 2
- City
- State/Province/Region

You can now choose which columns should be displayed on your entry manager and save it for future viewing. This allows you to display only the most important columns of your entries.

## Entry Viewer

Job Application Form > Entries > #1  
Viewing entry #1

What job are you applying for? Software Developer

Applicant Name Anna Main

Applicant Address 1378 Lynn Ogden Lane  
Beaumont, Texas 77701  
United States

What days are you available for interview? Monday  
Tuesday  
Wednesday  
Thursday

Are you willing to relocate? Yes

Upload your resume resume.doc

Your Email Address AnnaVMain@fontdrift.com

When can you start? 06/21/2008

Salary Requirements \$70000.00

Entry Options: Edit, Print, Email, Delete

Entry Info

Date Created 2008-04-22 10:39:47

Date Updated

IP Address 127.0.0.1

Viewing an entry is now a fast and exciting task. This brand new feature displays your entry in a nicely formatted table. The new navigation at the top also allows you to navigate between entries easily.

## Printer Friendly

Job Application Form > #1

What job are you applying for? Software Developer

Applicant Name Anna Main

Applicant Address 1378 Lynn Ogden Lane  
Beaumont, Texas 77701  
United States

What days are you available for interview? Monday  
Tuesday  
Wednesday  
Thursday

Are you willing to relocate? Yes

Upload your resume resume.doc

Your Email Address AnnaVMain@fontdrift.com

When can you start? 06/21/2008

Salary Requirements \$70000.00

Entry Info

Date Created 2008-04-22 10:39:47

Date Updated

IP Address 127.0.0.1

The new entry viewer is not just pretty to look at, it's also pretty to print! When you click on the print button, MachForm automatically apply a printer friendly style to your entry. The result, better look on paper and reduced ink consumption.

## Forward an Entry

Job Application Form > Entries > #1  
Entry #1

Email Entry #1 to:

test@appnitro.com

Use commas to separate email addresses

Send Cancel

Entry Options: Edit, Print, Email, Delete

Need to resend one of your entries to somebody? You can do it easily now. Forward any entry to multiple email address at anytime you want.

## Submission Review

MachForm

### Review Your Entry

Please review your entry below. Click Submit button to finish.

What job are you applying for?	Software Developer
Applicant Name	Anna Main
Applicant Address	1378 Lynn Ogden Lane Beaumont, Texas 77701 United States
What days are you available for interview?	<input checked="" type="checkbox"/> Monday <input checked="" type="checkbox"/> Tuesday <input checked="" type="checkbox"/> Wednesday <input checked="" type="checkbox"/> Thursday
Are you willing to relocate?	Yes
Upload your resume	<input type="checkbox"/> resume.doc
Your Email Address	AnnaWMain@fontdrift.com
When can you start?	04/24/2008
Salary Requirements	\$80000.00

[← Back](#) [Submit](#)

If enabled, users will be prompted to a preview page that lets them double check their entries before submitting the form. Great to prevent mistakes.

## Full PHP Embed Code

### Job Application Form ▶ Embed Code

Copy and paste one of the code below into your website

[Standard Form Code](#) [Advanced Form Code](#) [Simple Link](#)

```
Advanced Form Code:
<?php
require('var/www/appnitro.com/machform/machform.php');
$smf_param['form_id'] = 292;
$smf_param['base_path'] = 'http://www.appnitro.com/machform/';
display_machform($smf_param);
?>
```

This is for advanced user only, use this code to integrate your form into your \*.php pages as required.

[Instructions](#)

1. Copy and paste the code into your PHP page.

Don't like using IFRAME to embed your forms? As of version 2.0, MachForm provides native PHP code as an option to embed the form. You can paste the new PHP embed code to your existing PHP pages and the form will be displayed without using IFRAME. This means a seamless integration with your web page and faster loading time.

## New CAPTCHA option

When can you start?

MM DD YYYY

Salary Requirements

\$  Dollars  Cents

Type the letters you see in the image below.

M A D Z E

[Continue](#)

Beside the standard reCaptcha implementation, a new CAPTCHA implementation is introduced in this version. You are now able to choose between these two implementation for spam protection. GD extension is required in order to use this feature. If chosen, the CAPTCHA will be completely hosted on your server.

## Easy Translation

```
12 //single main and extended main
13 $lang['name_first'] = 'First';
14 $lang['name_last'] = 'Last';
15 $lang['name_title'] = 'Title';
16 $lang['name_suffix'] = 'Suffix';
17
18 //address
19 $lang['address_street'] = 'Street Address';
20 $lang['address_suite'] = 'Address Suite';
21 $lang['address_city'] = 'City';
22 $lang['address_state'] = 'State / Province / Region';
23 $lang['address_zip'] = 'Postal / Zip Code';
24 $lang['address_country'] = 'Country';
25
```

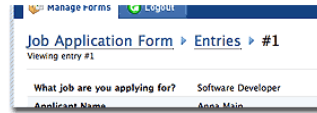

Great news for international MachForm users. You can now translate your form into your own native language, simply by modifying a single language file.

## Form Duplication

[Duplicate](#) [Delete](#)

Getting tired creating similar forms over and over again? We feel that and hate it as much as you do. Well, good bye boring task! You are now able to duplicate your form by a single click. Exactly, single click.

## Breadcrumb Navigation

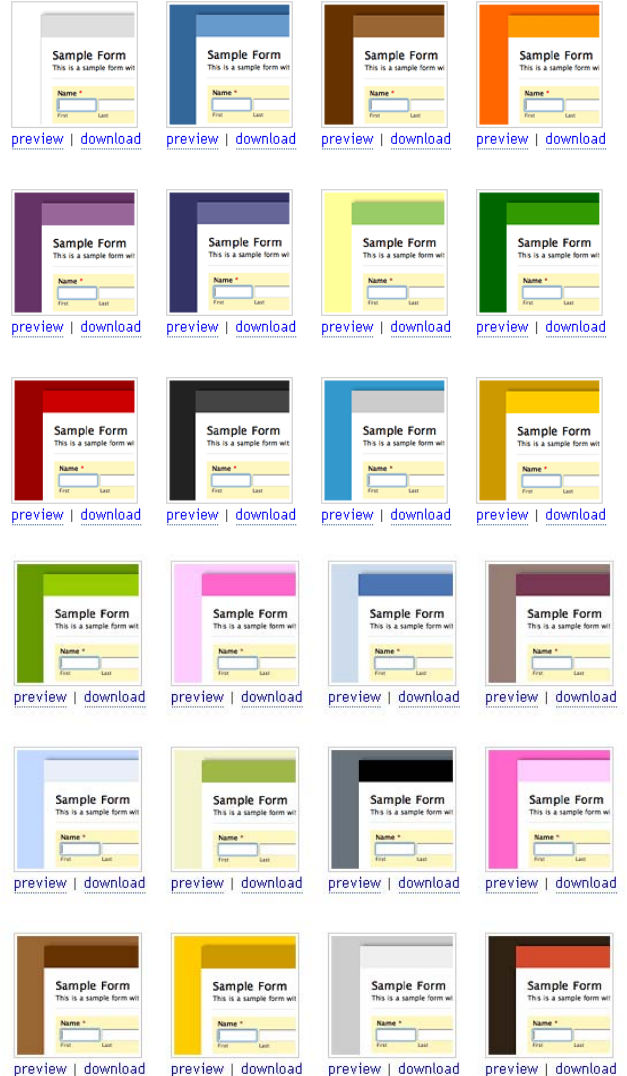

When you navigate through pages, breadcrumb navigation will be populated. Simply click one of the links to bring you to the appropriate page. A quick way to navigate over nested pages.

## SSL Support

No need to have special patch to enable SSL support. As of version 2.0 MachForm fully support SSL connection. You can access your form either from non-SSL or SSL connection.

## Form Themes Gallery

To use the theme, download the CSS file and copy the code into your form CSS.

## Features

★ Version 2 has been released [with more features!](#)

### Drag and drop interface

Carefully designed for ease of use, MachForm interface let you design your form as easy as drag and drop. It saves you time.

### Numerous field type selections

Adding a field to your form is just as simple as clicking button. Text, paragraph, multiple choice, dropdown, address; you name it. MachForm provides you with a complete set of well-designed field types to build your professional form. It makes you look professional.

### Ultimate Spam Protection

Goodbye spam! MachForm integrates the most secure and accessible CAPTCHA implementation from the [reCAPTCHA project](#). CAPTCHA protects your forms against bots by generating distorted images or sound test which can only be read/hear by human.

### Easy form manager

Form manager is the headquarters for all of your form building activities. Designed for high usability, so you can manage all of your forms in a simple, fun, non-confusing workspace.

### Email integration

For every form submission, you will receive **instant email notification** containing complete form submission data. **Multiple email addresses** are supported. This allows you to respond quickly to your users.

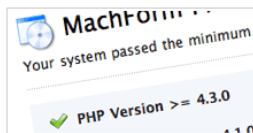

### MySQL database integration

All of your form submission data will be stored in MySQL database. No programming is needed; MachForm has done all the hard work for you.

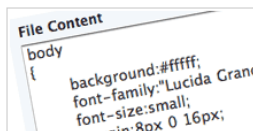

### Form validation

Rules are available for most form fields. *Required*, this rule will make sure that a user fills out a particular field. *No Duplicates*, this rule will verify that the data entered into this field is unique and has not been submitted previously.

### Easy installation wizard

One click installation. Yes, you read it correct! Only one click needed to finish the installation. Say goodbye to complicated installation steps. We make the wizard doing the hard work for you.

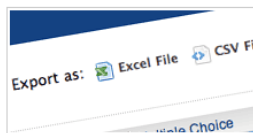

### Integrated with your website theme

Each form generated by MachForm has its own CSS file. You can customize the style of each form independently. Let MachForm **blends seamlessly into your site**. Check our [Form Themes Gallery](#)

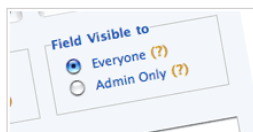

### File upload

Upload any file, as many as you want. No more limitation. Your hosting is the only limitation.

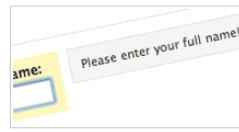

### Export data to Excel or CSV

Export your form submission data to an Excel file. This allows you to further analyze your data, create charts, reports or any other data processing.

### Show/hide any field

Fields that is set to *Admin Only* will not be shown to users when the form is made public. This is useful to create a field which is private just for you.

### Great tooltip

Don't let your users confused while filling out your form. Help them; put a nice tooltip with a descriptive guideline for each field. You don't want to get useless data right?

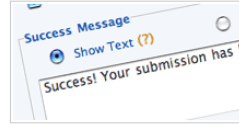

### Password protected form

If enabled, all users accessing the public form will then be required to type in the password to access the form. Your form is password protected.

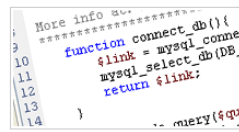

### Limit one entry per IP address

Use this to prevent users from filling out your form more than once. This is done by comparing user's IP Address.

### Customizable redirect/message after submission

After your users have successfully submitted an entry, you can redirect them to another website/URL of your choice, or just simply display your custom success message.

### Full PHP source code

We know you want flexibility. This is why MachForm shipped with completely full PHP source code. You are allowed to modify it to suit your specific needs. Please check our [license](#) for more detailed information.
